Comp212 - Assigment 1

JSLINT

JSlint options:
  browser: true   **because the code is designed for a browser**
  sloppy: true (missing 'use strict' pragma)   **I don't need the over bearing features of "strict"**

predefined global variables:
  • $
  • cookie
  • changeTheme
  • showHide
  • users
  • thread
  • forum
  • cookie

Testing

Testing done on my own WAMP server (since the cs dept proxy had issues)

Windows XP	Windows 7 Home	Windows 8 Pro	OSX	Fedora r18
Firefox	Internet Explorer 10	Internet Explorer 10	Safari	Web
Google Chrome	FireFox 23	FireFox 23.0.1	FireFox 18	FireFox 18.0.2
	Google Chrome	Google Chrome 28	Google Chrome	Google Chrome

Explored each page, clicked on every clickable element
    everything works as it should
viewed with style sheets disabled
    readable but clickable elements are less obvious
viewed with javascript disabled
    please enable javascript warning appears

Enhancments

  1. improved Threads:
    Title is shown, as is the total post count.
    the [-] and [+] icons collapse and expand the related thread post

  2. Change Theme
    Clicking the "Theme" button will open a selection of colours to choose from
    The chosen Theme is also saved using a cookie :)
